

Professor Steve Sacks' publications

1. Zhou W, Farrar AC, Abe K, Wang Y, Carroll M, Stahl GL, Sacks SH. Predominant role for C5b-9 in renal ischaemia/reperfusion injury. *J. Clin. Invest.* 105 (10):1363-1371. 2000
2. Springall T, Sheerin NS, Abe K, Holers VM, Wan H & Sacks SH. Epithelial secretion of C3 promotes colonization of the upper urinary tract by *Escherichia coli*. *Nature Med* 7 (7) 801-806. 2001
3. Pratt J, Basheer S, Sacks SH. Local Synthesis of Complement Component C3 Regulates Acute Renal Transplant Rejection. *Nature Med* 8: 6, 582-587. 2002
4. Monk N, Hargreaves R, Marsh J, Farrar CA, Sacks SH, Millrain M, Dyson J, Simpson E, Jurcevic S. Fc-dependent depletion of activated T cells occurs through CD40L-specific antibody rather than costimulation blockade. *Nature Med* 9 (10) 1275-1260. 2003
5. Zhou W, Patel H, Li K, Peng Q, Villiers MB, Sacks SH. Macrophages from C3 deficient mice have impaired potency to stimulate alloreactive T cells. *Blood*.107: 2461-2469. 2006
6. Brown KM, Kondeatis E, Vaughan RW, Kon SP, Farmer CKT, Taylor JD, He X, Johnston A, Horsfield C, Janssen BJC, Gros P, Zhou W, Sacks SH, and Sheerin NS. The influence of donor C3 allotype on late renal transplant outcome. *New England J Medicine* 354: 2014-23. 2006
7. Patel H, Smith R., Sacks S, Zhou W. Therapeutic strategy with membrane targeted complement regulator to increase the number of usable donor organs. *J Am Soc Nephrol* 17: 1102-1111. 2006
8. Farmer CKT, Hampson G, Abbs IC, Hilton RM, Koffman CG, Fogelman I, Sacks SH. Late low dose steroid withdrawal in renal transplant recipients increases bone formation and bone mineral density. *Am. J. Transplantation*.6 (12) 2929-36. 2006
9. Sheerin NS, Risley P, Abe K, Tang Z, Wong W, Lin T, Sacks SH. Synthesis of complement protein C3 in the kidney is an important mediator of local tissue injury. *FASEB J.* 2007 Nov 26
10. Rose KL, Paixao-Cavalcante D, Fish J, Manderson AP, Malik TH, Bygrave AE, Lin T, Sacks SH, Walport MJ, Cook HT, Botto M, Pickering MC. Factor I is required for the development of membranoproliferative glomerulonephritis in factor H-deficient mice. *J Clin. Invest.* 118(2):608-18. 2008-340
