

Rhubarb had a great time in x-ray!!

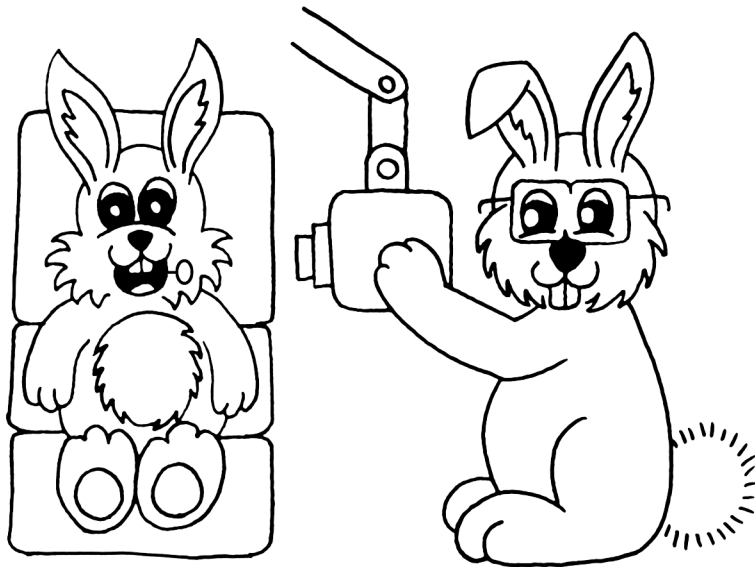

Rhubarb the rabbit is having an x-ray picture today.

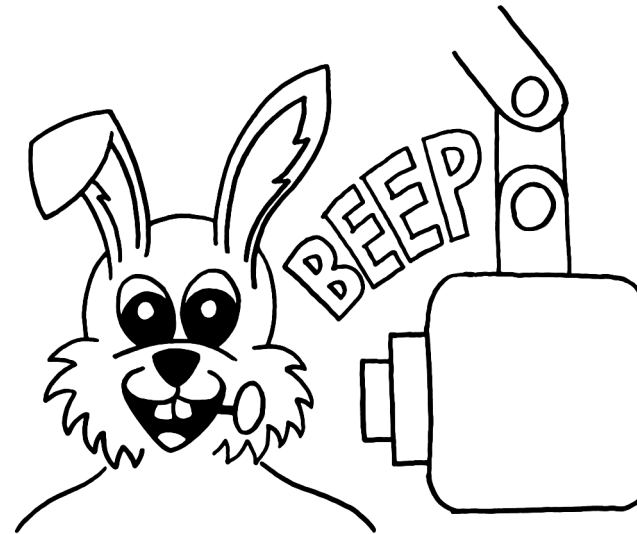

X-rays are special photographs to see inside your teeth and bones.

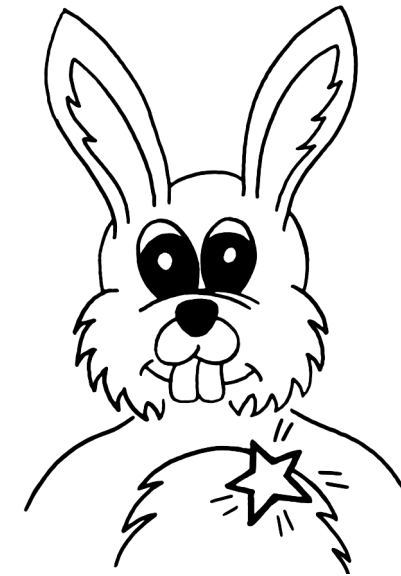

The radiographer tells Rhubarb to sit in a chair and shows him the camera.

The radiographer puts the x-ray photo in his mouth and Rhubarb bites his teeth together.

Rhubarb has to keep very still when the radiographer takes the photo.

Rhubarb gets a sticker because he was so good.
