</tbody>
</table>

### Notes

- Fill rates are published on NHS choices website, with the exception of Emergency Medical Unit.
- Wards with HDU are shown as a single ward (e.g. ICU remains within ICU).
- Specialty labels for wards are based on the main specialty associated with patients discharged from the ward.
- This means that treatment specialties currently used in the Trust (e.g. ICU - Vascular Surgery) are not available as options. 100 - General Surgery would be used instead if 80% or more of a ward's patients are for a single specialty only one is shown.

### Locally calculated measures
