

## Statement of Purpose

*Contents as set out in Schedule 3, The Care Quality Commission (Registration) Regulations 2009.*

Guy's and St Thomas' NHS Foundation Trust provides integrated hospital and community services. We provide local health services including community services, to people in Lambeth and Southwark, and specialist services to patients from across south London, south east England and further afield. As one of the largest trusts in England and Wales we see over a million outpatients every year, over 80,000 inpatients are admitted and there are over 850,000 patient contacts in the community, our emergency department has about 180,000 attendances. We employ over 15,000 staff and work in partnership with the Schools of Medicine, Dentistry, Nursing and Biomedical Sciences of King's College London and other higher education institutes to deliver high quality education and research.

Guy's and St Thomas' is part of King's Health Partners Academic Health Sciences Centre (AHSC), a collaborative of King's College London, Guy's and St Thomas', King's College and South London and Maudsley NHS Foundation Trusts.

### **1. The aims and objectives of the service provider in carrying on the regulated activity**

Our strategic vision is to be a high quality, high performing and innovative integrated academic healthcare organisation, and the major centre for a wide range of highly specialist services and associated research in south London as part of King's Health Partners.

This vision is supported by our values:

- Put patients first
- Take pride in what we do
- Respect others
- Strive to be the best
- Act with integrity

Underpinning the vision and values are four strategic priorities:

1. Provide safe productive care.
2. Use resources efficiently
3. Release the talent of staff
4. Build strong partnerships

These priorities are delivered through our *Fit for the Future* programme which is essential in helping us to deliver a balanced performance that brings together quality, safety and efficiency and puts the needs of our patients first.

To ensure that all staff understand that high quality services and an excellent patient experience are the first priority for the Trust Board all recruitment includes assessment against the Trust values.

**2. The kinds of services provided for the purposes of the carrying on of the regulated activity and the range of service users' needs which those services are intended to meet.**
